HDE MR75 & MR150 **ASPHALT RECYCLER "MINI"**

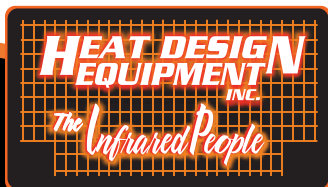

*May show Options

The Mini Recycler is an inexpensive, quick, low volume asphalt recycler. It is ideal for heating low volumes of asphalt. The HDE Mini Recycler can produce up to 2 ton of asphalt in an 8 hour day at temperatures below -15 C (5 F) with a operating cost of less than 1.50 per hour, all while filling potholes!

The recycler is designed to melt bricks of asphalt that is placed on a 2 inch (50mm) screen deck below a 75,000 BTU infrared heater. The brick is heated in minutes by the high intensity infrared heat. When the asphalt reaches its softening point, it falls through the screen into the storage area below. The guillotine door makes it easy to remove the hot asphalt from the recycler.

The Mini Recycler is available in both a Skid Mount and Single Axle Trailer Unit.
